> "Variety," the foremost theatrical paper of America, in commenting upon the recent opening of the company in New York, states that its ideas are revolutionary and will place the company ahead of the list at the end of the season. While Boston received the honors, and Worcester, Mass., one of the most critical show towns in New It is believed that burlesque under its present sponsors will have a new birth this year and much of the changes may be ascribed to Will Roehm who is well known in Bridge port theatrical circles.

Y. W. C. A.

The educational department of the Young Woman's Christian Association announces its fall opening. Miss Grace Clark, vice president of this department of association work, and Mrs. H. R. Philbrick, charman of the educational committee, have made English language in each course elaborate plans for the classes this year. There will be a large variety of subjects to choose from, each taught by the very best teachers the

city affords.

Because of the very cramped quarters of the association at 1097 Broad street, other rooms have been rented at 991 Broad street, in the Beers building. Here the dressmaking and millinery classes will bec arried on. The other classes and clubs will meet as formerly in the Central and East

the sense of sight, and makes it pos- riously depressed in London, declines sible for us to enjoy the beautiful. Without it man is placed at a great sibly through life, with diseased or deformed eyes and do little or nothing for them. They could barter the points, the child would have a greater earn-

as possible. look much at pictures, blocks or anything requiring close vision for a long time, as fusion of the vision does no take place until about the age of six, and for that reason children of four or five years of age should not be sent to the kindergarten, as close aplication of the eyes at this age causes more near sighted people than any other factor. Children are apt to form the habit of holding their books close to the eyes while studying; this. causes a strain of the muscles of the eyes both within and on the outside of the eyeball, which is another cause for near sightedness and is a cause

of cross-eyes.

We often have a stigmatism in children, and in order to see, they must hold the book close, and squint the eyelids; another cause for cross eyes. We occasionally see a child that is exceedingly far-sighted, and who to see properly, requires a lens even stronger than does the average per-

son at sixty years of age. · Poor vision often accounts for the ervous condition, so often found in children, headaches and so-called growing pains. Errors in vision very frequently cause cross-eyes and if child begins to show symptoms of cross-eyes, no matter how young, the eyes should be properly tested, and if necessary treated, as such conditions usually increase, and after they have reached the stage where one eye is used, the other eye loses its vision to a greater or less degree. If a child needs glasses they should be worn, but cheap stores and ped-dlers should be avoided. Reputable eye specialists should be consulted, for there are many children young persons wearing glasses today who do not need them, and many are
